SUMMARY

Recent B.Tech Computer Science graduate and current Python Developer Trainee with hands-on experience in full-stack development, including Python backend scripting, automation, REST APIs, computer vision projects, and React for interactive frontends. Passionate about building clean, user-focused applications and quickly adapting to real-world challenges in a fast-paced startup environment. Eager to join a high-tech company where I can explore cutting-edge technologies, grow as a developer, and contribute to innovative solutions that make a real impact.

EXPERIENCE

Python Developer | Miraigate Solutions

Feb 2026 – Present

- Actively developing and maintaining Python automation scripts and computer vision modules across multiple ongoing projects in a dynamic startup setting.
- Collaborating closely with team members on diverse roles, including coding, debugging, testing, and project coordination to support simultaneous deliverables.
- Handling multitasking responsibilities by contributing to 4+ concurrent projects, quickly adapting to shifting priorities, new requirements, and evolving tech needs.

Junior Consultant Intern | Hosho Digital

July 2025 - Nov 2025

- Developed Python scripts for backend data pipelines and APIs in a real-world project, managing databases and ensuring seamless integration with frontend elements.
- Automated general software tasks using Python and .NET, including data modeling with Microsoft Power Platform to maintain integrity and validation.
- Performed data engineering and analysis with Pandas and Seaborn, scripting custom solutions to handle client requirements efficiently.

Python-ML Intern | Alveofit (Roundwork Technologies)

Feb 2025 - March 2025

- Developed and deployed a two-stage XGBoost ML pipeline for real-time asthma predictions, monitoring model performance and debugging via EDA on datasets.
- Built a Flask REST API with robust validation and error handling, integrating models for production use and ensuring seamless operations.

PROJECTS

Real-Time Traffic Intelligence System | Miraigate Technology

- Built a real-time computer vision pipeline to detect, track, and count multiple object classes from live camera streams with low-latency GPU-accelerated inference
- Designed a line-crossing counter with occlusion handling, ghost track suppression, and multi-class aggregation across concurrent video streams.
- Implemented automated stream health monitoring to dynamically score and select viable camera feeds based on scene visibility, traffic density, and frame integritySecure

Multi-User Task Management System | Python, FastAPI, Streamlit, SQL

- Developed a scalable backend API with FastAPI and SQL, implementing automated testing (Pytest) and cloud deployment (Render) to ensure reliable production-like operations.
- Secured system with JWT and hashing, focusing on data privacy and error handling for seamless user management.

Disease Prediction System | ETL, Data Analysis, Machine Learning, Python, Flask

- Built an ETL-driven Flask API using XGBoost for disease predictions, with feature encoding and error handling to support real-time production inference.

TECHNICAL SKILLS

- **Programming Languages:** Python (scripting & automation), JavaScript, C#, SQL, HTML/CSS
- **Frontend:** React.js, Streamlit
- **Backend:** FastAPI, Flask, Django, .NET
- **Databases & Tools:** MySQL, MSSQL, Git/GitHub, Postman, VS Code, PyCharm
- **AI Tools:** Antigravity, Claude Code
- **Other:** RESTful APIs, CI/CD basics, Automation (Selenium), Data Visualization (Power BI, Seaborn)

EDUCATION

Medicaps University

Bachelors of Technology in Computer Science and Engineering

2021 - 2025

CERTIFICATIONS

- **Microsoft Power BI** - Advanced Analytics and Data Analysis, Business Intelligence, Data-Driven, Decision Making, Interactive Data Visualization
- **Alteryx Certification** - Alteryx, ETL, Problem Solving, Data Analytics, Analytical Skill
- **Figma UI/UX** - Web Designing
